

Chest X-ray Intelligence Report

Generated by: Chest X-ray Intelligence Hub

Patient details

Patient ID: 1
Name: Kalyani I
Age: 20
Gender: Female
Clinical notes:
diabetes

Analysis summary

Model: SSL Encoder (Self-Supervised Learning)
Feature dimension: 512
Abnormality score: 0.2770000100135803
Risk category: Low risk
Generated on: 2026-05-21 21:53:51

Recommendations

- Low abnormality signal; maintain routine clinical monitoring.
- Recommend annual follow-up imaging or symptom-based review.
- History of diabetes: coordinate management with endocrinology and monitor for infection risk.

Detailed feature review

Top feature weights are shown below to support clinical review and follow-up.

Feature	Value
Feature 1	0.00158
Feature 2	0.39224
Feature 3	0.31691
Feature 4	0.26580
Feature 5	0.21403
Feature 6	0.25821
Feature 7	0.29120
Feature 8	0.14324
Feature 9	0.09062
Feature 10	0.43649
Feature 11	0.22964
Feature 12	0.33021
Feature 13	0.32421
Feature 14	0.11927
Feature 15	0.51002
Feature 16	0.13446
Feature 17	0.09638
Feature 18	0.70063
